## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's amendment filed on August 19, 2004 have been fully considered, however, arguments regarding claim 10 are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Hoshino et al. (U.S. Patent No. 5,995,204).

Regarding claim 10, Hoshino et al. discloses an image reading method in which a color balance of light incident on an image sensor, which reads an image recorded on a photographic material by dividing the image into a plurality of pixels and separating each of the plurality of pixels into a plurality of colors and outputs data of the plurality of colors, is adjusted in

Art Unit: 2622

accordance with information representing a type of the photographic material so that outputs for the plurality of colors from said image sensor are substantially equal regardless of the type of the photographic material (col. 8, line 52 through col. 9 line 50).
